Camper Paperwork & Health Information

CampDoc.com

Badgerland Camps use [CampDoc.com](#) for online health and related camper background records. Camp Staff will review your camper's health and dietary needs prior to attendance. This allows us to adequately prepare for all of our camper's needs and/or accommodations and reach out with

any clarifying questions. Campdoc must be completed 3 weeks prior to your camper's summer session.

Visit CampDoc.com for more details on their system and security measures.

Important

You will receive a "Welcome Email" with information about how to complete your camper's health information and other forms.

- Click the link in the email to set the password for your CampDoc.com account.
- Follow the instructions and complete or update the information for your camper. Alerts will appear for any missing required information.
- Download and upload any required documents to your CampDoc.com account.
- Return to CampDoc.com at any time to make changes/updates to your camper's health information before camp begins.

COVID Protocol

- Girl Scout safety is always our top priority. COVID-19 vaccines are strongly encouraged, but not required, for members attending Girl Scouting events including summer camp and other Badgerland overnight activities.
- For the duration of 2024, Badgerland reserves the right to mandate vaccinations for program attendees in the event of updated protocols recommended by county, state, or federal health agencies. In the event of a change in policy that impacts your program, refunds will be available.
- Do not attend if you are experiencing COVID symptoms.

Medications

- All medications brought to camp, prescription and over-the-counter, must be listed in CampDoc.com
- All medications are given to the Health Supervisor on opening day and dispensed by the Health Supervisor or a certified medical professional during the camp session (asthma rescue inhalers and epi-pens are kept with the camper and counselor at all times).
- ALL medications must be in their original containers and must be labeled with the pharmacist's label, showing the camper's name and directions for use. (Ask your doctor about requesting travel sizes of prescription medications.) This includes vitamins and over-the-counter medications. Without this, the medication cannot legally be given to your camper.
- Camp has first aid supplies as well as over-the-counter medications such as Children's Tylenol, Ibuprofen, Benadryl, Tums, Pepto-Bismol, etc. Do not send these medications.
- Ensure medications are accessible to be turned in to the Health Supervisor at check-in.

Their Safety is the Top Priority

All camp staff complete a 14-day training period that includes: Girl Scout Safety Activity Checkpoints, Girl Scout Safety Guidelines, American Camp Association (ACA) Standards, WI State Standards, Emergency Procedures, Behavior Management, Homesickness, Child Abuse Awareness, Risk Management, On-site and Off-site Trip procedures, fire building and extinguishing training, Diversity training, and Waterfront/Pool Safety. Additional training is required for staff working at the waterfront, archery and leading trips. All staff are certified in a minimum of First Aid, CPR and automated external defibrillators (AED). Camp Ehawee's Health Center is equipped with an AED, first aid supplies and emergency equipment.

Campers learn about camp emergency procedures within the first 24 hours of arrival, and participate in an emergency drill during their stay. Campers learn about our severe weather procedures and where to go during an emergency. The camp has three weather radios. Along with utilizing the weather radios to monitor the weather, local officials and Girl Scout office staff will contact camp to inform us in the event of approaching severe weather.

Visitors to camp are met by camp staff and escorted to the Camp Office where they are issued a visitor tag, and escorted by a staff member around camp. ALL staff members have a 2-way radio for constant communication.

The camp staff will contact parents about their camper in the event of:

- Significant or extensive homesickness that affects the camper's ability to enjoy the camp experience.
- Illness or injury that requires care from a doctor or hospital.

Outdoor Safety

Here are helpful hints on how you can help protect your camper while they are living and playing in the woods:

- Encourage body cover (long pants, shirts, socks, hats) as appropriate for the weather and activities.
- Apply an insect repellent containing 10-30 percent DEET (recommended for children) and up to 50 percent DEET (for adults). Reapply per package directions throughout the duration of the activity. We recommend spraying the repellent on clothing rather than skin when feasible.

Lyme Disease

In Wisconsin, Minnesota, and the eastern coastal states, this bacterial disease is transmitted to people and animals by the bite of the deer (bear) tick (*Ixodes dammini*).

West Nile Virus

West Nile Virus is now in most of the United States. The most frequent way people become infected is through the bite of an infected mosquito.

For additional information about Lyme Disease and West Nile Virus, contact your local Public Health Agency or:

- Wisconsin Department of Natural Resources: 1.888.936.7463 or www.dnr.state.wi.us
- Wisconsin Department of Health & Social Services: 608.266.1865 or <http://dhs.wi.gov>

Important to Note

Part of what campers are learning at camp is to take personal responsibility for themselves and learn independence. While we ask that campers take personal responsibility to use insect repellent, sunscreen, and wear appropriate clothing, camp staff will remind them frequently to use it and to make sure they are wearing clothing appropriate to the activity they are participating in. If your girl needs additional assistance at camp, they will be helped by the Health Supervisor.

Head Lice

Since head lice is highly contagious, please do periodic checks prior to your camper's start date. It is disappointing to campers if head lice are identified during check-in. If a camper is found to have evidence of nits or lice, they are not permitted at camp. Please do checks leading up to check-in day to allow time for treatment of your child should it be needed. Visit www.headlice.org for a resource.

Camp Food

Eating properly is an important part of a great camp experience. Good nutrition combined with great tasting food makes a happy camper! Lunches are eaten picnic style at Lake Shore.

Our lunch menu is full of camper friendly items. We cater our lunches, with **examples** being sandwiches, pizza, tacos, etc. We also offer at each lunch a fruit and a juice.

Food Accommodations

We are experienced at accommodating special food needs in an inclusive way. We offer food options that match the main meal for all campers whenever possible. If your camper has food restrictions or allergies, please note that with their [CampDoc](#) profile. Additionally, **if your camper has a medical or religious restriction make sure to include that information in their [CampDoc](#) profile.**

Don't Send Snacks

Please do not send snacks or candy to camp. Snacks and candy attract wildlife. Our Food Service Manager arranges for healthy, tasty snacks for the campers. If a camper becomes hungry, there are always snacks available. Your camper just needs to tell their counselors and they will be more than happy to get them a snack as soon as possible.
