

May Patch Challenge

THE GREAT SPACE CHALLENGE

Kick-off: April 30 | Challenge: May 1 - 31

Do you love looking at the stars and exploring the world around you? You're invited to join the national Girl Scouts Great Space Challenge! There's no need for special equipment—just a love of the stars and a view of the sky from the great outdoors or even your bedroom window. Complete the requirements to earn the Discover Space patch!

BEGIN YOUR CHALLENGE HERE

Attend the Virtual Kick-off Event

Attend the virtual kick-off and learn from a space expert to start this challenge. Dr. Beth Johnson is a geology professor at University of Wisconsin-Oshkosh, Fox Cities Campus in Menasha, WI. She spends much of her time teaching about the physical history of the Earth, which includes things like volcanoes, earthquakes, glaciers, fossils, and minerals, to name a few. But she also works with the Office of Education and Outreach at NASA to share the science and stories of samples of rocks that were collected on the Moon so students can learn more about geology no matter what planet they are on.

• **April 30 @ 5:30pm**

• **\$10** (includes patch in the mail & kick-off event)

NEXT: Keep an eye out for new space-themed programs coming to Badgerland this spring! Join us for one of these out-of-this-world programs!

THEN: Spend the month working to meet the challenge by completing the additional minimum number of activities for your age level
