

Think Like a Citizen Scientist

.....

Take Action Ideas Generator

Project Ideas

Are you ready to *Think Like a Citizen Scientist*? Apply your new skills as a data collection scientist to a conservation, climate or stewardship project that needs your help. Use the Take Action Ideas Generator to help your girls take the lead on a Badgerland-area Take Action project to complete the journey. Consider localizing your project to make an impact in your own community. You could gather and contribute data to a Citizen Science organization or project in Wisconsin, host a citizen science awareness fair in your community or talk to local government about the importance of citizen science in local conservation policy. Need extra help with a big idea? Visit a local or national conservation organization, data research station or group of dedicated citizens that can help you make an impact!

Once you've completed your project, submit it to the [GSUSA Take Action Map!](#)

Note: This is a list of useful links. Badgerland Council does not necessarily have a formal relationship with these organizations.
